

- DATA SHOW THAT THE EU'S 2030 CLIMATE AND ENERGY FRAMEWORK IS INSUFFICIENT TO MEET THE OBJECTIVE OF THE PARIS AGREEMENT (BASED ON FAIR SHARE)
- HOWEVER, THE EU IS FACING SOME CHALLENGES WHILE SETTING ITS CLIMATE TARGETS
- ARE THESE OBSTACLES BIG ENOUGH TO JUSTIFY THE LACK OF AMBITION?
- IS THE EU'S CONTRIBUTION REFLECTING THE EU'S HIGHEST POSSIBLE AMBITION?

Current (national)  
case law:

- Emissions reduction by 2020 at least 25 %
- Competitiveness of the economy is not a justification
- Proportionality necessary - interim targets?

## EU CONTRIBUTION UNDER THE PARIS AGREEMENT THROUGH THE 2030 CLIMATE AND ENERGY TARGETS
